TECHNICAL SKILLS

- Python, JavaScript, C, Bash, SQL, Rust
- Assembly (ARM, MIPS, RISC-V)
- AWS, Azure, Docker, Kubernetes
- Morpheus CMP, ServiceNow
- React, Node.js, Flask
- TensorFlow, PyTorch, Scikit-learn
- Git, Linux, REST APIs

LANGUAGES

Italian	Native
English	C1
French	B2+

OTHER

- Driver's License B
- Problem Solving
- Technical Documentation

WORK EXPERIENCE

Cloud Consultant (Part-time)

2024 – Present

Reply Santer Nimbus · Turin, Italy

- Automated user provisioning workflows via Python + Morpheus API, reducing manual overhead by 80%
- Engineered data reconciliation pipelines between vCenter, Morpheus CMP and ServiceNow ITSM
- Developed Bash-based connectivity verification tools for 500+ Windows/Linux endpoints
- Implemented Secret Management (Cyphers) and RBAC auditing for multi-tenant platforms
- Developed automation tasks (Bash/PowerShell/Chef) for lifecycle management of Application Servers and multi-engine DBs

Student Collaborator

2023 – 2025

Politecnico di Torino

Internal support and administrative collaboration within university departments.

EDUCATION

M.Sc. Computer Engineering (AI)

2024 – Present

Politecnico di Torino

Large Language Models for Software Engineering (LLM4SE)	28/30	Advanced Machine Learning	26/30
System Programming	In progress	Robot Learning	30/30
Software Engineering	30/30	Bioinformatics	29/30
Data Science & DB Tech	27/30	Web Applications I	27/30
Big Data Processing	26/30	Network Technologies	26/30
Computer Architecture	22/30		

Erasmus Exchange Program

Feb – Jun 2024

Y SCHOOLS · Troyes, France

Courses: Entrepreneurship, CRM, Salesforce Management, Brand Management, Web Design, Global HR, Cultural Studies.

B.Sc. Management Engineering

2021 – 2024

Politecnico di Torino

Final Grade: 96/110 · Key: OOP (30/30), Web Dev (26/30), Databases, Statistics, Operations Research

Technical Diploma (Electronics)

2016 – 2021

ITIS Q. Sella · Biella

Final Grade: 94/100

CERTIFICATIONS

Cambridge English: First (FCE)
Grade A · Level C1 · Score 181 · Dec 2020

French Language Certificate
Level B2/B2+ · Y SCHOOLS · Jun 2024

PROJECTS

LLM for Software Engineering

github.com/LLMProjectPolito/LLMProject

Collaborative test case generation using multi-agent architectures (Actor-Critic, Adversarial, Swarm) evaluated on Gemma models and code coverage benchmarks.

Cloud Infrastructure Automation

In Development

Python/Bash scripts for cloud provisioning automation and multi-tenant environment management.

Semantic Correspondence with Vision Transformers

github.com/Johnnyprice29/Project_AML

Specialization of the DINOv2 visual foundation model for robust and sub-pixel accurate semantic correspondence, using PEFT techniques (LoRA, BitFit) and Segment Anything (SAM).

Robot Learning Projects

github.com/Johnnyprice29/project-extension

A comprehensive collection of projects and exercises for the Robot Learning course, including Sim-to-Real extension, Q-Learning, and Policy Gradients.

md-katex-pdf

github.com/Johnnyprice29

Node.js library for converting Markdown to PDF with KaTeX math rendering and professional styling.
